Address: Dunedin

Career Objective

As a second-year Data Science student, I am actively seeking an internship that will provide me with the opportunity to apply my academic knowledge and growing skillset in a real-world environment. I am excited to contribute to the success of your organisation!

Apart from my academic pursuits, I am a curious and dedicated individual who values teamwork, collaboration, and effective communication. While studying full time, I have consistently sought part-time work to not only earn extra money, but also to engage with others and contribute to a shared goal. I believe that these experiences have helped me develop essential skills for fostering a productive and successful work environment.

Skills Summary

Intellectual Curiosity

Took a non-compulsory paper during summer school: During the summer break, I was eager to continue learning and broaden my horizons. I travelled to Auckland and enrolled in an exciting paper that I discovered. This experience not only allowed me to delve deeper into the subject but also exposed me to new perspectives and approaches, demonstrating my strong intellectual curiosity and commitment to lifelong learning.

Self-development

Working on personal Python projects: By dedicating my free time to building and experimenting with various applications, I have gained a deeper understanding of programming concepts and honed my problem-solving skills.

Interpersonal skills

Adept at building strong relationships and fostering a collaborative atmosphere, I'm not afraid to ask for advice from senior colleagues and always willing to offer help. My empathetic nature, active listening, and adaptability have consistently led to successful problem-solving and seamless conflict resolution in both professional and personal settings.

Education

Bachelor of Applied Science in Data Science (Minor in Economics) at University of Otago

Experience Summary

Delivery Driver - Domino's

2022 - 2023

- Serving customers at the counter, taking phone orders, taking payments. Helped me develop my communication skills
- Upselling drinks and sides to customers to bring the most value for the business
- Working in a team with other people in a fast paced environment

Agronomy Assistant - Leaderbrand

2021

- Testing germination rates of different batches of seeds
- Gathering data about performance of different varieties of asparagus
- Delegating tasks and supervising

Technical Skills

- Java: Object-oriented programming experience, including game and GUI development.
- Git: extensively used services like GitBucket and GitLab for all of my projects
- Python: Developed an app that automatically takes notes from specific pages of a book as a side project
- Some experience with C and SQL

Interests

- Multiplayer strategy games: it has helped me sharpen my strategic thinking and problem-solving skills. This hobby also complements my interest in history and provides a fun and interactive way to explore data-driven decision-making, as I try to optimise various in-game modifiers.
- Mixology: I have a strong interest in the art of mixology, experimenting with various ingredients and techniques to create unique and flavorful cocktails. This hobby has helped me develop a keen sense of taste, attention to detail, and creativity in combining flavours. It is also a fantastic skill to have for hosting events.
